TECHNICAL SKILLS

Proficient: JavaScript, ES6, Node, Express, React, Github, HTML, CSS, Redux, Selenium Webdriver, Jest
Knowledgeable: SQL, Sequelize, PostgreSQL, Jasmine, Mocha, Chai, React-Redux
Some Familiarity: React Native, OAuth, Next.js, Gatsby, GraphQL

EXPERIENCE

Techolution | Full Stack UI Developer | New York, NY   2/2018 – 2/2019

- Worked as an automation engineer and front-end developer at a Techolution client (J.Crew).
- Created automated integration tests and helped develop an internal automation testing environment to allow manual QA testers to run automated tests, reducing QA time by up to 30%.

Self-Employed | Freelance Graphic Designer (Part-Time) | Queens, NY   8/2013 – 5/2017

- Spent 5-10 hours per month working on 7-8 flyers and/or 2-3 multi-flyer campaigns.

PROJECTS

JDASH | Developer   2/2018 – 2/2019

A dashboard created at J.Crew for several internal tools, including an automated testing environment.
- Used React and Redux to create an automated testing dashboard, which runs a suite of integration tests (written with Selenium Webdriver and Jest) in a Docker container and generates a customized HTML report that includes screenshots and steps to reproduce failed tests.

Viewtrition | Developer | https://youtu.be/w72mSp2WKW0   11/2017 – 12/2017

An iOS app, created as part of a group project while at Fullstack Academy, that takes pictures of food and returns nutritional data.
- Used React Native, Create-React-Native-App, and Expo to build an iOS app featuring user login, a camera, and various graphs and charts.
- Queried Clarifai API for photo recognition and Nutritionix API for nutrition information.

Pics Or You Didn't Medal | Sole Developer | http://racemedalpics.herokuapp.com   11/2017

Hackathon, completed in 5 days, giving users nearby locations for post-race medal pictures.
- Used React and React-Redux for the front end to display pictures and allow for race data input, an Express server and RESTful api on the backend for routing and serving pages, and a PostgreSQL database to store user and race information.
- Queried Flickr API to gather photos and Nominatim API to get location coordinates.

EDUCATION

Fullstack Academy of Code | NYC Web Development Fellowship   8/2017 - 12/2017

General Assembly | Front-End Web Development (Part-Time Course)   1/2017-3/2017
